

I am appaled at the idea of limiting competition in this country. Over the last 30 years we have been breaking up monopolies - public or otherwise. It makes no sense to create one. Satellite radio offers me things that the local radio stations dont, and it makes no sense to me to eliminate the one and only resource they offer, especially full time traffic and weather. I urge you to not allow special interest groups dictate what I can hear, watch, see, listen to, recieve, subscribe to, or otherwise. That is a violation of public interest and not in keeping with the notion of a free society.

Best Regards,

Thomas Dowling
